SAMOA'S WAR ENDED.

Mataafa Brought to Terms by the Great Powers.

A BATTLE WITH MALIETOE'S FORCES

In the Conflict Mataafa's Loss Was Seventeen Killed and Sixteen Hurt-Among the Heads Brought to the King Were Those of Two Amazons.

Those of Two Amazons.

APIA, via San Francisco, Aug. 5.—Warbroke out between Malietoa's and Matafa's force., but warships of Germany and Great Britain, as a result of a conference between the consuls of the three powers, intervened and stopped the fighting. There was no American vessel there. On the demand of the German and British officers Matafa and his chiefs promptly surrendered. Mataafa's loss in the brief battle was sixteen killed and seventeen wounded. Malietoa had four killed and twelve hurt. Malietoa had four killed and twelve hurt. Malietoa had carefully planned his attack, and but for the accidental discharge of a gun, which precipitated the conflict, Matafa's forces would nave been exterminated. It is the customs of the Samoans to decapitate killed or even wounded enemies. Among the heads brought to the king were those of two women, but it is believed they were killed by mistake, though they took an active part in the fight. When the warriors returned to Apia each man who had the luck to cut the head off an enemy marched through the streets with it, and walked up the street yelling like flends, with eyes starting from their sockets with excitement and throwing the several heads about like baseballs, blood dripping all over the bearers. Many heads were brought in in this manner, and after being exhibited about the town were presented to Malietoa's army consisted of about 1,000 fighting men, armed with rifles, axes and long knives. This army, with martial music, consisting of whisles, cornets, horns and drums, started on the morning of July 8 toward the seat of war. Malietoa's army consisted of about them.

music, consisting of whisles, cornets, horns and drums, started on the morning of July 8 toward the sent of war. Malieton's army was far more powerful than Mataafa's, having plenty of arms and ammunition and many more warriors. Malietoa also had the advantage in securing the aid of tribes which Mataafa had counted upon to back him.

aid of tribes which Mataafa had counted upon to back him.

On July 13 King Malletoa sent an ultimatum to Mataafa demanding the surrender of himself and chiefs, the sole condition being that their lives would be spared. No reply was made to this.

On July 16 the British man-of-war Katoomba arrived at Apia, bringing joint instructions from the powers that the rebellion must be subdued. The commanders of the British and German warships and the consuls of the three powers held a consultation. It was decided to demand Mataafa's surrender, and the British and German warships sailed for Manona. They arrived there early on the morning of July 18, and sent word to Mataafa that if he did not surrender before 1 p. m. his camp would be shelled by the ships and Malletoa's warriors landed. As the Mataafaites were weak in numbers and were short of ammunition they would have been slaughtered had this program been carried out.

A quarter of an hour before the time was

out.

A quarter of an hour before the time was up Mataafa and his chiefs boarded the Katoomba and surrendered. The Katoomba and Buzzard had cleared for action and men stood at the guns. Forces had gone to the side of the island to prevent escape in that direction. The German vessels returned to Apia, while the Katoomba remained to disarm the followers of Mataafa. The following is a copy of a letter sent by the consuls to Mataafa, demanding his surrender: surrender:

surrender:

"We, three consuls of treaty powers, hereby give you notice that if you and your chiefs and wounded come on board the English man-of-war within three hours from the time that the boat which brings this reaches Manona your lives will be spared. If you do not come the three men-of-war will open fire on you and you will be attacked by the king's forces. Your followers must bring all their arms to the British man-of-war for safety. If you do not surrrender you may still send your women and children alongside the British man-of-war, and they will be safe. No boat will be allowed to leave Manona unless it comes direct to the British man-of-war."

of-war."

Mataafa replied as follows: "I have agreed to all you have written me. We are pleased to obey with humility the great powers."

The consuls issued the following processors.

lamation: "We, consuls of the treaty pow-ers, hereby give notice to all Samoans that Mataafa and his chiefs have surrendered. Mataafa and ms cmets have surrendered. The war is quite finished; any further disturbances will be suppressed by the menof-war. All Samoans must return at once to their own districts. Any disobeyance to their own districts. Any disobeyance of this notice will be summarily dealt with.'

Beath Officers Confident That the Disease Will Not Enter Our Ports.

New York, Aug. 5.—It has been settled to the satisfaction of the health authorities that the three deaths occurring on the steamer Karamania on its trip from Naples was not Asiatic cholera. As a special precaution, however, the Karamania's passengers were this morning taken to Hoffman Island, where they were bathed and then sent to Swinburne Island for observation. One ward will be strictly isolated for patients should new cases develop.

Dr. Cyrus Edson, health commissioner

velop.

Dr. Cyrus Edson, health commissioner of this city, says:

"The mere fact that the Karamania was detained at quarantine should not be a source of great alarm, for never in the history of this country has its sanitary condition been so good.

"Cholera has been generally prevalent in the interior of Russia and in Asia ever since last year, and has been known to be epidemic in the south of France since March of this year. Its existence in Naples has recently come to life, though it has not yet become epidemic there. The north of Europe has been free of cholera since April, when some cases occurred in Laurient, one of the northern provinces of France. I have said that the sanitary condition of the United States in general is excellent, and this is more especially true of the large cities.

"Thanks to the energetic work of the various boards of health, there is little or no cause to fear as to impure drinking water. Sojourners at summer resorts, however, should exercise particular caution, as the water used at these temporary places of residence is frequently contaminated, not at present with cholera germs, but with other germs of diseases which may weaken the system so as to afford a lodging place for cholera germs should these be introduced later.

"That the health authorities of this city are able to combat the disease, even should it reach this country, a contingency which

are able to combat the disease, even should it reach this country, a contingency which I scarcely class among the possibilities, was amply demonstrated in the way that the few cases were handled which appeared here last year, and further it may be said that the sanitary condition of the city is better now than it was then."

OUTLOOK ENCOURAGING

A Decided Feeling of Relief in Monetary Circles.

MILLIONS OF GOLD COMING OVER.

Notwithstanding an Unusual Number of Failures and Suspensions It Is Believed That the Existing Depression Will be Followed by a Speedy Recovery.

New York, Aug. 5.—Dun's review of the state of trade says: Demoralization in speculative markets have been followed by a more healthy tone, and heavy imports of gold inspire hope that monetary troubles may abate. The week has been one of surprises. Enormous liquidation in wheat brought the lowest price ever known on Tuesday. The crash of the pork ring took 45 per cent. from the nominal price of that product in an hour, and caused several failures for millions each. Extraordinary depression in stocks, a slaughter which included some of the best, were quickly followed by a bear panic and sensational advances. Mean-while in the money market there has come a singular sense of relief, notwithstanding actual increase in present embarrassments, almost amounting to paralysis of exchange between the chief commercial cities, and of many industrial works, hecause even 2 per cent, premium for currency fails to secure what is neaded for

exchange between the chief commercial cities, and of many industrial works, because even 2 per cent, premium for currency fails to secure what is needed for payment of lwages. Hopes are nevertheless fixed upon the ships bringing over \$11,000,000 gold across the sea, and on the extra session of congress, which will begin on Monday.

Several of the largest and boldest operators at Chicago have been crushed under pork barrels, but the instant increase of foreign purchases convinces the markets that the disaster has brought a certain measure of relief. The monetary stringency which at last crushed speculations in wheat and hog products had been caused in part by their prevention of exports, and their absorption of enormous capital in carrying unprecedented stocks of products which, if sold in time to foreign consumers, would have brought gold enough to prevent much evil. With the great surplus of wheat brought over from previous years, the country will be able to meet all demands, even though the crop proves small enough to justify a considerable advance from previous prices. With a great crop of corn almost assured, unusual accumulations of pork and hog products would be safer on the ocean than in Chicago warehouses, and more helpful to the country.

Stocks at the lowest point this week

products would be safer on the ocean than in Chicago warehouses, and more helpful to the country.

Stocks at the lowest point this week averaged little more than \$41 per share, but it is yet a long way down to the prices of 1877, averaging at the lowest \$23 per share, and the contrast between the condition and earnings of railroads now and then is greater than the difference in price. Railroad earnings continue fairly satisfactory, though they show a recent decrease, especially since reduction of rates for World's fair travel.

Bank failures have been almost as numerous this week as for either of the two preceding weeks, but fewer have been of more than local importance. The western states show greater distrust or weakness than other sections. Out of 169 banks failed since March five were in eastern states, forty-eight in southern and 151 in western states. Failures of national banks numbered fifty-eight, of state banks seventy-nine, and of private banks sixty-sevent nates the stock of the provide than seventy-nine, and of private banks sixty-seventy-nine, and of private banks sixty-sev ty-nine, and of private banks sixty-seven. In anxious efforts to fortify themselves, banks throughout the country have locked banks throughout the country have locked up a large amount of currency, and depositors who have drawn their accounts are also keeping out of use many millions. As the entire circulation of bills of less than \$5 each is but \$71,000,000, while the depositors in savings banks number nearly 5,000,000, the withdrawal or mere withholding of accustomed deposits by a considerable proportion of their would put out of the market much of the small notes.
